Additional Means of Communication.—The Southern Maratha Railway, which was opened for traffic from Poona to Miraj in 1886, passes through the district from north to south for 84 miles and runs through the entire length. In 1902-1903 the district contained 354 miles of metalled road and 766 miles of road suitable for fair weather traffic only. The new roads and works of importance constructed since 1875 are as follows:—

Famine.—Famine occurred in the district in 1896-97, due to failure of crops in the affected tracts from the want of seasonable rain. The whole district was affected. Relief works were opened and continued for 14 months. The maximum number receiving relief reached 31,361 in April. In 1899-1900 the rains again failed, and the district was visited by severe famine. Out of the total area of 4,987 square miles, 4,622 square miles were affected, and the outturn was only 45 per cent of normal. Relief works were opened and continued till November 1901. The daily average number at the commencement was 313, but rose to a maximum of 57,768 in May. The number in receipt of gratuitous relief was 17,067 in September. The death-rate was 45.52 per mille. The number of deaths from all causes on relief works was 903, of which 369 were attributed to dysentery and diarrhoea and 260 to cholera. The percentage proportion of sexes and children among the relief workers was 36 men, 45 women and 19 children. The average wage per worker unit was Re. 0-1-2. In 1900-01 the area affected remained the same as in the previous year. The highest number in receipt of relief was 27,976 and, on an average for the entire period, 4,802 persons were gratuitously relieved. The death-rate during the year was 27.54 per mille. (For further details see Table XIII.)

Plague.—Sātāra District was one of the earliest to be attacked in the whole presidency. Indigenous plague broke out in 1897 in the villages of Koregaon and Jāvli talukās, the infection having been imported from Bombay. Thence it reached Karād in July, and led to great mortality. The largest number of cases recorded in one week (23rd October 1897) was 6,857. The epidemic spread throughout the district, and reached its zenith in October 1897. The district has suffered more severely from the epidemic than any other. The total mortality from the disease

up to the end of 1903-04 has been 114,580 or 10 per cent. of the total population.
